

Goal Show Help and Information

The goal show system is a new type of show where you can perform for multiple customers at the same time in a private room from money they have tipped in during the goal show pre-show. During your goal show pre-show you can set how much money a customer must tip to join the goal show and what money goal you would like to reach in the allotted amount of time you set. The objective is to get as many people to tip in to help you reach your goal within the time period you set.

You specify the criteria of the goal show before the goal show pre-show starts. You can determine what your money goal is and the period of time in which you want to meet that goal. You also specify the minimum amount of money a customer must tip in for them to enter the goal show as well as how long you will perform for once the goal show starts.

Below are the step-by-step instructions on how to setup your goal show and how it will be presented to you and the customers throughout the process from goal show pre-show to the actual goal show itself.

Setup Explanation

Clicking the 'Goal Show' button in your broadcast interface will allow you to choose your settings for your goal show.

A window titled 'Goal Show Setup' with a blue header and a question mark icon. The main content area has a text input field with the label 'What I'll do in the show: (min 10 / max 130 chars; max of 5 lines)'. Below this are four input fields with labels and ranges: 'Tips Requested: (min 1 / max 999)', 'Minimum Buy In: (tip amount / min 1)', 'Show Minutes: (min 4 / max 60)', and 'Minutes to Goal: (min 1 / max 40)'. Each field has a dollar sign (\$) to its left. At the bottom are three buttons: 'RESET', 'SAVE', and 'START REQUEST'.

- **What I'll do in the show** – This is a description of how you will perform and what you'll be doing in your goal show. This description should be detailed and appealing. This is what will get customers to tip in order to join your show.
- **Tips Requested** – This is how much money in tips you would like to make in the time period you will specify in 'Minutes to Goal'. An example would be if you want to try and get \$100 in tips in 30 minutes during your goal show pre-show you would set this value to 100.
- **Minimum Buy In** – This is the minimum amount of money a customer will need to tip in for them to be eligible to join the goal show. Customers can tip in more than the minimum amount to help you reach your goal. If you would like each customer to be required to tip \$5 to get into your show you would set this value to 5.

- **Show Minutes** – This is the amount of time you must perform the show for after the minutes to goal timer has counted down. If you do not perform the show for the full allotted time specified all tips you earned will be forfeited back to the customer and you will not be paid.
- **Minutes to Goal** – This is the amount of time you specify in order to reach your goal during the goal show pre-show which you have set in the 'Tips Requested' box. If you are trying to get \$100 in 30 minutes you would set this value to 30.

Note: During your goal show pre-show you will not be able to accept private shows.

Setup Example

START REQUEST

When your goal show pre-show has started after clicking 'START REQUEST' your broadcast interface will change displaying your goal show information at the top. You have the ability to cancel your goal show at anytime however you will lose any tips you have received. You can choose to force your goal show at anytime which will essentially set your goal countdown timer to 0 and the goal show will start assuming at least one customer has tipped in. You might want to do this if customers have already tipped in and you don't want to wait any longer for other tips you can force start your show.

Goal Show Started: \$ 0 0 0

Member Bought In: 0
Goal Countdown: 19:54

CANCEL GOAL SHOW

Customer Contributions:

As customers tip you and contribute towards your goal show their usernames and amount tipped in will appear in the listing on your model broadcast interface:

userstate1	\$10.00
fryer	\$15.00

- Customers will only show up in the list if they have contributed to your goal show
- Customers will not be able to see this list
- If you cancel your goal show pre-show this list will be reset

Customer Experience – Goal Show Pre Show

When your goal show pre-show has started customers will see the following interface when they join your room. The customer will see how much time is remaining to reach your goal as well as how much your goal is and how much money has been contributed thus far to the goal.

- When the goal show pre-show is started customers will see a new button called 'RESERVE A SPOT FOR MY SHOW'.
- When customers click this button they will be presented with the following screen in which they can tip in and contribute towards your goal. This screen also tells them what the minimum tip in amount is.
- Customers who have already contributed a tip towards your goal can also continue to tip in and help you reach your goal.

- If the customer has already contributed a tip towards your goal show and click the 'RESERVE A SPOT FOR MY SHOW' again they will see the following screen

Starting the Goal Show

- The goal show can be force started at anytime if you have already received enough tips and want to start the show without waiting for the countdown timer to hit 0 seconds.

- When the timer hits 0 seconds and you have received tips towards your goal you will be presented with a prompt to either start your show or cancel the show. You will have 80 seconds to respond to the prompt before it times out and your show is automatically cancelled. If you do not respond to the prompt or you choose not to start the show you will lose all tips that have been contributed and they will be returned back to the customers.

Note: You can still start your goal show even if you don't hit your goal.

- If your goal is reached you will be automatically prompted to start the show. You will have 80 seconds to acknowledge the prompt before the show is automatically cancelled. If you wish you can choose to not start the show even if you hit your goal.

Warnings

- If you cancel your goal show during the pre show you will receive the following warning. If you choose to continue and cancel you will lose all tips contributed towards the goal show.
- If you attempt to logout of the model interface during a goal show pre show you will also be presented with the same dialog.

Performance

Once your goal show has started the top bar of your model interface will change showing the countdown left for the goal show performance that you committed to as shown below. If customers enter your goal show who did not contribute during the pre show you will see your dollar amount increment and they will enter the room.

Completing Your Goal Show

If you do not complete at least 90% of your goal show time that you have committed to performing you will lose all tips that were contributed during the pre show. It is only fair to the customers that they receive the full show time for what they contributed to. Customers will also receive money back if you do not complete the show in full. For example if a customer tipped in \$10 and only 50% of the committed show time was completed they will receive \$5 back in their account.

Customer Experience

Once you have started the goal show customers who have contributed towards the show will automatically be taken into the goal show with you.

- Any customer who has not contributed to the goal show when it starts will be shown the following screen. They still have the ability to get into the goal show. They will have to tip in the minimum amount just like any other customer.
- Customers who join the room and were not present for the goal show pre show can also still get into the goal show. They will be shown how much time is remaining in your goal show.
